

Anh Thu Huynh

Frontend Developer • Waterloo, Ontario • huynhthuhuynh2611@gmail.com • +1 4378828262
• <https://www.linkedin.com/in/thwhxx/> • <https://github.com/thwhxx> • thwhxx.github.io

Frontend Developer with hands-on experience in Angular, Next.js, and React.js. Strong in building responsive UIs, integrating RESTful APIs with Spring Boot and PostgreSQL, and converting Figma designs into production-ready interfaces. Comfortable working in collaborative environments with GitLab and CI/CD. Passionate about delivering polished user experiences.

SKILLS

Frontend: HTML, CSS, JavaScript, Responsive UI

Frameworks: Angular, React.js, Next.js, Node.js

Tools: Figma, Git, GitLab, CI/CD

Backend: Java, Spring Boot, PostgreSQL, MySQL, C#, Python (basic)

Cloud: AWS (deployment basics)

Soft Skills: Fast learner, problem-solving, communication

EXPERIENCE

BStarSolutions - Web Developer Intern

May 2024 – Aug 2024

- Built and maintained responsive web features using Angular.
- Integrated RESTful APIs developed with Spring Boot and connected to PostgreSQL.
- Developed dynamic UI pages for multiple store apps using Next.js and React.js.
- Implemented secure authentication and authorization with Keycloak.
- Converted detailed Figma designs (e.g., Staff Effort Report UI) into pixel-perfect interfaces.
- Collaborated using GitLab (branching, merge requests, reviews) and coordinated work through Teams & OpenProject.

EDUCATION

Ontario College Advanced Diploma – Computer Programming and Analysis

Conestoga College

Sep 2025 – Present

Ontario College Advanced Diploma – Computer Programming and Analysis

Durham College

Jan 2024 – May 2025

(Transferred to Conestoga College in Sep 2025)

PROJECTS

- **Bank Management** (<https://github.com/thwhxx/BankManagement>)
This solution is part of the Bank Management project, a .NET application designed to manage banking transactions and accounts. It includes features such as account balance checks, deposits, withdrawals, and transfers.
- **Record Searching, Displaying File Upload and Password Update**
(<https://github.com/thwhxx/INFT2100-Lab-3-Record-Se...>)
This lab focuses on enhancing your web application with the following features: record searching and displaying, file upload functionality, and password updates. You will integrate these features into your existing web application.
- **JS Connect** (<https://github.com/thwhxx/INFT2202-ICE3>)
JSConnect is a dynamic web application developed using JavaScript, designed to facilitate seamless contact management, user login, and registration functionalities. With JSConnect, users can effortlessly manage their contacts, securely log in to their accounts, and register for new accounts with ease. Leveraging JavaScript's versatility, this project offers a user-friendly interface and robust backend functionality, ensuring a smooth and efficient user experience.
